**Product** Name Organoid® MOOS HELLGRÜN on flax backing

self-adhesive

Article number MOSHGR0085FVSST

**Producer** Address ORGANOID® TECHNOLOGIES GMBH

Nesselgarten 422 / Top 5

A-6500 Fließ Austria

Description and applications

Name Organoid® MOOS HELLGRÜN on flax backing

self-adhesive

Description Natural plant material in full coverage on

natural non-woven flax backing on strong selfadhesive foil produced climate neutral in Tyrol,

Austria

Applications Suitable for applications on smooth surfaces

such as glass, metal, composite materials or rough surfaces like plasterboard or concrete. Ideal for adding a finish to furniture or walls.

Plant material and

density

Plant material

Bright green upcycled moss

Density Premium density, full coverage

Size and weight Size 1 360 mm by 2 950 mm

 $\begin{array}{ll} \text{Thickness} & \text{1.4 mm} \\ \text{Weight} & \text{830 g/m}^2 \end{array}$ 

**Product requirements** Food-safety Binding agent safe for usage in contact with

food in accordance with EU-regulation

1935/2004

**Backing material** Material Natural, non-woven flax fleece on' self-

adhesive foil

Properties Strong adhesive, backing made from

r'enewable resources

Requirements PVC-free

Contains no dangerous substances in

accordance with annex 2, § 3 of the regulation

(EC) 1907/2006

heat-resistant up to 120° C

Technical implementation

Cut

Pay attention to

Use scissors, a cutter or a plotter

Edges Allow for imperfections 1-2 mm around the

edges

How to install Draw the release paper from the self-adhesive

foil, place on chosen surface (dry application) Exact placement of the foil is important, as

readjustments are not possible due to the

strong adhesive qualities of the product

The haptics and optical appearance of the moss can change with air moisture levels: with

increased moisture, the surface appears more smooth and soft, with lower moisture, it is harder and more brittle. This can lead to the surface area varying slightly. This may lead to gaps forming with butt joint application (up to 2 mm). This is a natural characteristic of moss and not a reason to issue a complaint.

Acclimatisation of Organoid natural surfaces:

- Bring product to room temperature before unpacking
- Store product protected from light, at about 20°C and 50-65 % relative humidity
